

Fallsafe.
Fall Protection Systems

**The safe working
platform that's
a smarter way
to build.**

fallsafe.co.nz

The safe and smart

way to build.

Discover the benefits

of Fallsafe.

Fallsafe is a working platform that provides a safe environment while allowing you to work more efficiently. It's a safety system that eliminates the risk of falls on site. And it's a game-changing work deck that will help your team get the job done with ease and speed. No nets, no scaffolding, no falls; just a safe and smart working platform.

- The safest option for commercial and residential builds
- Eliminates the risk of falls on site
- Provides a large working area for your team
- Gives ample space to hold tools and materials
- Simple, lightweight and versatile design
- Profiled non-slip surface for improved grip
- Available in a range of sizes and three leg heights
- Made from high-density polyethylene (HDPE)
- Rugged and durable
- Water, rot, UV and chemical-damage resistant
- Can be loaded to a maximum of 2kN/m²
- Quick and easy to install
- Can be fitted to almost any site
- Choose to hire or buy, with excellent after sales service.

Built to carry the load.

The Fallsafe platform system is built from rugged industrial plastic and designed to withstand the rigours of the construction industry. While the individual components are lightweight and easy to manoeuvre, once locked into place, they become a strong and sturdy work deck that can carry a building team, handheld tools and materials.

A safe working platform that's a smarter way to build: easier, faster and more efficiently.

Tested to the highest standards.

Made from durable and rugged high-density polyethylene, Fallsafe is water, rot and UV-resistant, non-tear and resistant to damage by chemicals. It has a profiled non-slip surface for improved grip and can be loaded to a maximum of 2kN/m².

Fallsafe undergoes rigorous testing at all stages from design to manufacture. It has been tested to BS EN12811-1:2003 and ACR (M) 001:2005 industry standards. Fallsafe is categorised as suitable for masonry or heavy duty, allowing it to be loaded out for masonry work, concrete block work and very heavy cladding.

Better on the body, easier on the mind.

With a large and sturdy platform to work from, Fallsafe gives you the freedom to use your body with ease and the benefit of a large deck area to hold tools and materials. Say goodbye to stretching, lugging and constant trips to fetch gear.

Fallsafe is the safest working platform in New Zealand, which means when it comes to the safety of your team, you get the added benefit of peace of mind.

Why choose Fallsafe?

Here's why.

01

Simple

Fallsafe is a simple, lightweight and versatile design that is quick to install and can be fitted to almost any site.

02

Strong

Made from durable industrial plastic, Fallsafe undergoes rigorous testing to the highest standards and can be loaded to a maximum of 2kN/m²

03

Smart

A wide and sturdy platform that fits your build means you can move and work with confidence, and faster than before.

04

Safe

With Fallsafe installed at height you are not just minimising the risk of falls, you're eliminating it.

Get Fallsafe on site, it's easy. **Hire it. Buy it. Call 0800 3255 7233**
